Enrique Mezarina Rodriguez

Woodbridge, VA | 703-955-6932 | ejmr413@gmail.com | github.com/Ejozef13

EDUCATION

George Mason University — B.S. in Computer Science | Expected May 2028

Northern Virginia Community College — A.S. in Computer Science | Fall 2025 | GPA: 3.54

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, SQL, Bash; HTML/CSS

Frameworks & Data: FastAPI, WebSockets, SQLite/FTS5, NumPy, Tkinter, PySide6/Qt

AI & ML: Ollama, RAG, Whisper, Piper, implicit-feedback ALS, Recall@K, NDCG@K

Tools & Systems: Git, Docker/Compose, Linux, unittest, Playwright, Proxmox, WireGuard

PROJECTS

April — Local AI Agent & Voice Companion | Python, FastAPI, Ollama, SQLite

github.com/Ejozef13/April

- Built a local voice assistant integrating Whisper transcription, Ollama inference, and Piper synthesis through a FastAPI/WebSocket backend, browser interface, and optional Qt tray client.
- Implemented tool routing, approved-folder retrieval with SQLite FTS5, source-cited web search, and editable persistent memory with explicit save, recall, and forget controls.
- Designed serial request processing, bounded audio capture, cancellation, and subprocess cleanup; added fixture-based regression tests for failure recovery and interaction state transitions.

Audino — Music Recommendation & Analytics | Python, NumPy, SQLite

github.com/Ejozef13/Audino

- Implemented implicit-feedback ALS matrix factorization in NumPy, with popularity and artist-affinity baselines, persisted model artifacts, and a popularity fallback for unknown listeners.
- Built chronological evaluation with Recall@K and NDCG@K, separate discovery/repeat-listening tasks, and catalog coverage reporting; exercised the pipeline on synthetic listening events.
- Developed transactional, idempotent event imports with conflict validation, timezone-aware listening analytics, a web dashboard, and SVG/Markdown summary exports.

AM — Local AI Coding Practice | Python, JavaScript, Ollama, Docker, SQLite

github.com/Ejozef13/AM

- Built a browser coding workspace that generates debugging exercises for Python, Java, C, and C++; validated structured model output through blind review and reference-solution execution.
- Implemented resource-limited Docker runners with networking disabled and deterministic output/mutation checks; persisted attempts, resumable drafts, goals, and review scheduling in SQLite.

Auto-Maintenance — Multi-Car Service Tracker | Python, Tkinter, JSON

github.com/Ejozef13/Auto-Maintenance

- Built a desktop app with vehicle-specific service records, searchable/sortable history, CSV export, and mileage/date/cost validation; separated storage logic from the interface.
- Implemented integer-cent cost storage, temporary-file replacement, backups, and legacy-data migration; added automated storage and GUI regression tests.

EXPERIENCE

Prince William County Parks and Recreation | Woodbridge, VA

Duty Manager | October 2026–Present

- Coordinate facility readiness, staff priorities, and responses to safety and operational issues during public hours.

Water Park Supervisor | Summer 2026

- Supervised water park operations and coordinated lifeguard/pool staff coverage to maintain safe, organized shifts.

Ellis & Associates Lifeguard Instructor | 2024–Present

- Delivered full-day lessons for 30+ participants, evaluated rescue and emergency-response skills, and adapted instruction to different experience levels.
